The Journal of Mathematical Analysis and Applications presents papers that treat mathematical analysis and its numerous applications. The journal emphasizes articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, and engineering, particularly those that stress analytical aspects and novel problems and ...

Classical CLT. Let  $\{X_1, \dots, X_n\}$  be a random sample of size  $n \rightarrow \infty$  that is, a sequence of independent and identically distributed (i.i.d.) random variables drawn from a distribution of expected value given by  $\mu$  and finite variance given by  $\sigma^2$ .

In quantum chromodynamics (QCD), color confinement, often simply called confinement, is the phenomenon that color charged particles (such as quarks and gluons) cannot be isolated, and therefore cannot be directly observed in normal conditions below the Hagedorn temperature of approximately 2 trillion kelvin (corresponding to energies of ...

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

Feedback Control Theory John Doyle, Bruce Francis, Allen Tannenbaum c Macmillan Publishing Co., 1990

## Feedback Control Theory

By measuring  $V_m(t)$  and the propagation velocity  $\hat{V}$ , we could obtain  $V_m(t - x/\hat{V})$  and hence  $i_m$  from Equation 4.1. Although the determination of  $i_m$  is straightforward, the accuracy depends on the uniformity of the preparation as well as knowledge of the parameters  $r_i$ ,  $r_o$ , and  $\hat{V}$ .

Bibliography. Mathematical Methods for Physics and Engineering by Riley, Hobson, and Bence. Cambridge University Press For the quantity of well-written material here, it is surprisingly inexpensive in paperback.

## Mathematical Tools for Physics

Abstract. We introduce a general framework for modeling functionally diverse problem-solving agents. In this framework, problem-solving agents possess representations of problems and algorithms that they use to locate solutions.

## Groups of diverse problem solvers can outperform groups of
