RESEARCH REPORT 127 - Health and Safety Executive

Factor. Problems With Current Models. Appropriate Corrections. Accessibility. Most transportation models primarily evaluate mobility (movement), and fail to reflect accessibility (peopleâ€™s ability to obtain desired goods and activities).

Online TDM Encyclopedia - Transport Model Improvements

Composition. The largest part of most combustion gas is nitrogen (N₂), water vapor (H₂O) (except with pure-carbon fuels), and carbon dioxide (CO₂) (except for fuels without carbon); these are not toxic or noxious (although carbon dioxide is a greenhouse gas that contributes to global warming).

Measurements of the air flow generated by a ceiling fan were collected in an environmental chamber in controlled conditions. The developed 3D transient CFD model is able to represent the key characteristics of the air flow generated by the fan.

Transient three-dimensional CFD modelling of ceiling fans

The chemicals targeted by the Stockholm Convention are listed in the annexes of the convention text: Annex A (Elimination) Parties must take measures to eliminate the production and use of the chemicals listed under Annex A. Specific exemptions for use or production are listed in the Annex and apply only to Parties that register for them.

Listing of POPs in the Stockholm Convention

Environmental Pollution is an international journal that seeks to publish papers that report results from original, novel research that addresses significant environmental pollution issues and problems and contribute new knowledge to science.
